

A HOME OF YOUR OWN

not a lifetime of rent

A door that's yours. A key in your hand. A place to put down roots and build a life.

For a whole generation, that simple promise has slipped away.

We think a home shouldn't be a lottery ticket. It should be the reward for doing the right things.

Belonging. Security. A place to call home.

Our plan to bring a home within reach:

SECTION I — Build the homes Canadians actually need

- ✓ Cut the red tape that stalls construction for years
- ✓ Prioritise homes families can buy and afford — not just investment units
- ✓ Use Canadian resources and Canadian labour to build them

SECTION II — Keep the dream attainable

- ✓ Treat housing as a home first and an asset second
- ✓ Honest planning, so supply keeps pace with the people who need it

SECTION III — Put first-time buyers and renters first

- ✓ A fair shot for first homes — ahead of speculators and absentee owners
- ✓ Protect renters from being priced out of their own communities
- ✓ Match newcomer numbers to the homes and services we can actually provide — so everyone has a place, and everyone succeeds

A home isn't a luxury. It's the foundation everything else is built on.
