

YOUR SHARE OF THE WEALTH

not a rigged system

Canada generates enormous wealth.

You help create it every day.

The question is why so little of it reaches the people who actually did the work.

The Common Good Party has a plan to change that.

Here is our plan:

Return the profits back to you

The banks, telecoms, grocers, and energy companies generate billions in profit every year — from you. We buy them out at fair value, make every Canadian a shareholder, and return those profits as a direct Citizen Dividend to every working Canadian.

Back the businesses that built Canada

Small and medium enterprises protected by law. Fair access to capital. Compete on merit, not connections.

Build housing and put Canadians to work

Non-market homes at scale. Rents capped at a fair share of your income. Backed by a serious investment in the trades, because we cannot build what we need without the workers to build it.

Lower the cost of living

The same few corporations set the price of your food, your phone, and your mortgage. That is not competition. We will fix it.

Fix the infrastructure we have been ignoring

Roads, bridges, and water systems in a state no wealthy country should accept. We invest in what lasts, rather than letting the bill grow larger every year.

Healthcare, education, and dignity in retirement

End the waiting. Abolish tuition. Cancel student debt. Dental and prescription drugs in the public system. Seniors who worked a lifetime deserve a pension that actually covers the cost of

A rigged system does not fix itself.
